

Welcome to clear thinking

We help to deliver complex programmes through the integration of programme management and systems engineering. This means that you maintain a clear picture of your goals and how they are being realised, which builds the coherence you need to make informed decisions.

“Where will our knowledge take you?”

Welcome to clear thinking

Imagine a world you fully understand, where you have a clear view of the journey ahead.

To bring this clarity to your world of programme complexity and uncertainty requires a holistic approach to the application of Programme Management and Systems Engineering. BMT Hi-Q Sigma understands this need.

We bring you added value and efficiency through an unparalleled range of expertise in the fields of Programme Management and Systems Engineering.

We are the only truly independent company in the marketplace who can offer such a breadth of service.

In the complex world which we know you face every day, our goal is simple and steadfast:

to bring clarity.

Taking an enterprise wide view, we help you to establish a clear picture of the route ahead.

From a genuinely objective viewpoint, our hands-on consultants will apply best advice and best practice to enable you to progress to each new stage with confidence.

Service and Capabilities

BMT Hi-Q Sigma

Provides specialist support through the lifecycle of complex programmes.

We utilise the breadth of our Programme Management and Systems Engineering capability so that you receive a tailored and objectively defined solution to suit your needs.

We bring you clarity through

Strategic guidance in the establishment and management of programmes;

Project Optimisation of existing programmes;

Interim support and knowledge transfer, building complete confidence.

How we can help

Portfolio Management

Setting the direction and scope of your portfolio of projects, to ensure outcome are compatible with the overall business direction and objectives.

Project Diagnostics

Independent and impartial advice to provide assurance and confidence in the deliverability of your project.

Business Planning and forecasting

We provide support to Ports and Public Transport Authorities in developing their business plans for transport infrastructure. This includes environmental services, policy advice and transport demand modelling. We have also assisted during the implementation of development strategies and identified financial and strategic investment options as well as suitable financial partners.

Enterprise Architecture

Enabling you to understand, document, communicate and manage the components of your business to the optimum levels.

Risk and Opportunity Management

Creating the environment, the processes and tools for risk management and opportunity exploitation.

Project Controls and EVM

Support for the development of Earned Value Management systems that enable profound understanding of current project performance.

Investment Appraisal

Cost management and strategic advice to help you use market forces to the best advantage.

Business Process Management

Delivering high value insight and expertise across the business processes.

Requirements Definition

Requirements are mapped to project outcomes and provide full assurance that the expected benefits are quantifiable, measurable and achievable.

Planning and Schedule Management

Help in correlating and integrating schedules to enhance reliable decision-making and forecasting.

Feasibility Studies and Due Diligence

Providing financial assessments of ports and terminals, either as part of a due diligence process or in the context of business consultancy for ports and terminals. This includes financial services on behalf of the asset owners, potential vendors or any financial institution involved in an acquisition or merger process.

Training and Mentoring

A range of public and bespoke programmes from highly-skilled and experienced practitioners.

Our Markets

Defence

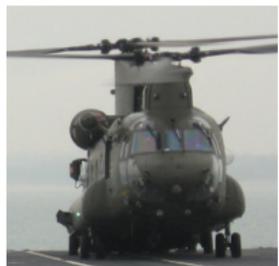

Expertise in Programme Management and Systems Engineering to support the delivery of some of the most complex defence projects and programmes. We work with the MOD and Prime Contractors to establish the processes, tools and skills to enable successful programmes.

Energy

Energy projects are complex, needing tight controls to ensure objectives are met to time and cost performance. We have a proven track record of working in multi million pound projects and making a very significant sustainable difference to our clients.

Transport

We work with Investors, Ports and Terminals, Policy Makers and Transport Operators to inform their investment decisions. This includes the provision of financial, commercial and technical expertise to a wide range of transport projects from low cost coastal protection schemes to the design and operation of major oil terminals and container ports. Our services span the entire lifecycle, from the provision of market intelligence and due diligence services to post-acquisition strategic and operational advice.
